

Select and use eye/face protection to prevent contact based on the results of an exposure assessment. The following eye/face protection(s) are recommended:

Indirect Vented Goggles

Skin/hand protection

Select and use gloves and/or protective clothing approved to relevant local standards to prevent skin contact based on the results of an exposure assessment. Selection should be based on use factors such as exposure levels, concentration of the substance or mixture, frequency and duration, physical challenges such as temperature extremes, and other use conditions. Consult with your glove and/or protective clothing manufacturer for selection of appropriate compatible gloves/protective clothing. Note: Nitrile gloves may be worn over polymer laminate gloves to improve dexterity.

Gloves made from the following material(s) are recommended: Polymer laminate

If this product is used in a manner that presents a higher potential for exposure (eg. spraying, high splash potential etc.), then use of protective coveralls may be necessary. Select and use body protection to prevent contact based on the results of an exposure assessment. The following protective clothing material(s) are recommended: Apron - polymer laminate

Respiratory protection

An exposure assessment may be needed to decide if a respirator is required. If a respirator is needed, use respirators as part of a full respiratory protection program. Based on the results of the exposure assessment, select from the following respirator type(s) to reduce inhalation exposure:

Full facepiece air-purifying respirator suitable for organic vapors and particulates

For questions about suitability for a specific application, consult with your respirator manufacturer.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

General Physical Form:	Liquid
Specific Physical Form:	Liquid
Odor, Color, Grade:	yellow, solvent odor
Odor threshold	No Data Available
pH	Approximately 5.5
Melting point	Not Applicable
Boiling Point	>=170 °F [Details: (initial)]
Flash Point	34 °F [Test Method: SETAFLASH]
Evaporation rate	Approximately 6.4 [Ref Std: XYLENE=1] [Details: CONDITIONS: calculated]
Flammability (solid, gas)	Not Applicable
Flammable Limits(LEL)	Approximately 1 % [Details: CONDITIONS: calculated]
Flammable Limits(UEL)	6 % [Details: CONDITIONS: calculated]
Vapor Pressure	129 mmHg [@ 20 °C] [Details: CONDITIONS: calculated]
Vapor Density	1.7 [Test Method: Estimated] [Ref Std: AIR=1]
Density	6.8 lb/gal
Specific Gravity	0.82 [Ref Std: WATER=1]
Solubility In Water	Approximately 10 %
Solubility- non-water	No Data Available
Partition coefficient: n-octanol/ water	No Data Available
Autoignition temperature	500 °F [Test Method: Estimated]
Decomposition temperature	No Data Available
Viscosity	<=25 centipoise [@ 20 °C] [Details: (Typically 5 cps)]
Hazardous Air Pollutants	<=45.4 % weight
Volatile Organic Compounds	780 g/l [Test Method: calculated SCAQMD rule 443.1] [Details: Calculated]
