

MATERIAL SAFETY DATA SHEET

Section 7. Handling and Storage

Avoid generating dust and dust accumulation. Dust removal should be performed by a suitable industrial vacuum cleaner, central exhausting or wet methods. Store in a ventilated, dry storage area. Do not store with corrosive materials (acids and bases), or oxidizers.

Section 8. Exposure Controls/Personal Protection

Ventilation:	Under some industrial conditions, use of local ventilation may be appropriate to control dust hazards.
Respiratory Protection:	If needed, use a NIOSH-approved dust mask/respirator when exposed to respirable dust. Follow OSHA requirements found in 29 CFR 1910.134 regarding respirators.
Eye Protection:	Use safety glasses with side shields when handling material.
Skin Protection:	Use appropriate rubber gloves when handling material. Light protective clothing is recommended. Wash hands before eating.

Note: Personal protection information in Section 8 is based upon general information for normal uses and conditions. Where special or unusual uses or conditions exist, it is suggested that the assistance of an industrial hygienist or other qualified professional be sought.

Section 9. Physical and Chemical Properties

Appearance:	Grey solid
Odor:	Not characteristic
Melting Point:	Not determined
Boiling Point:	Not determined
Vapor Pressure:	Not determined
Vapor Density (Air = 1):	Not determined
Solubility in Water:	Practically insoluble
Specific Gravity (H ₂ O = 1):	Density = 2000 kg/m ³
Percent Volatile by Volume:	Not determined
Evaporation Rate (Ethyl Ether = 1):	Not determined
Viscosity:	Not determined
