Information not available		
11. Toxicological information		
In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification. It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.		
11.1. Information on toxicological effects		
<u>Metabolism, toxicokinetics, mechanism of action and other information</u>		
Information not available		
<u>Information on likely routes of exposure</u>		
Dusts may be inhaled or come into contact with the eyes and skin.		
<u>Delayed and immediate effects as well as chronic effects from short and long-term exposure</u>
