

ITT Industries

SAFETY DATA SHEET

According to 2001/58/CE – DM 07/09/2002 – ISO 11014-1-Reg. N°1907/2006/CE

7. Handling and storage

Handling:

No special measures are required.

Storage:

store only in the original container.

8. Exposure controls/personal protection

General precautions:

observe the good rules of industrial hygiene and the precautional measures which are usually taken in the handling of the composite materials.

Respiratory protection:

respiratory protection is not required, but avoid to breathe powder. Metallic powders could contribute to irritate respiratory track. In case of insufficient ventilation, use a breathing mask with filter type BS EN 149 – 29 CFR 1910.134.

Protective equipment:

observe the good rules in the handling of composite materials.

Gloves (type EN 388 - 29 CFR 1910.138) are recommended when handling brake parts, because some persons may be sensitive to partially cured phenolic or cashew resins and develop dermatitis type reaction upon skin contact.

Eye protection:

not required.

General hygiene considerations:

The following general hygiene considerations are recognized as common, good industrial hygiene practices: don't eat, don't drink, don't smoke during handling. Wash hands after use and before handling.

General information:

This product doesn't contain asbestos. However, it may contain some non-asbestos fibers such as aramid. While we are not aware of any specific health hazards caused by exposure to the friction material dust containing these fibres, general studies of very fine breathable fibres, physically similar in diameter and length to asbestos, indicate the possibility in case of overexposure, of chronic lung disease, including fibrosis.
