Section 5 – Firefighting Measures

5.1 Extinguishing media:

Suitable extinguishing media: Carbon dioxide, dry chemical, foam, water spray

Unsuitable extinguishing media: Water. Do not use water jet as an extinguisher, as this will spread the fire.

Unusual Fire Hazards: None

5.2 Special hazards arising from the substance:

Hazardous combustion products: CO and CO₂ may be present due to incomplete combustion.

5.3 Advice for firefighters:

Suitable protective equipment: Self-contained breathing apparatus required. Firefighters should wear suitable protective gear. Move containers from fire area if you can do it without risk. Do not let firefighting water runoff enter sewer.

Section 6 – Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures:

For non-emergency personnel: Evacuate the danger zone; follow emergency precautions. Call emergency assistance immediately. Wear personal protective equipment. Evacuate personnel to safe areas. Ensure adequate ventilation. Keep away from open flames, and sources of ignition. Ensure all equipment is electrically grounded before beginning transfer operations.

Emergency procedures: Not available

6.2 Environmental precautions: Do not flush into surface water or sanitary sewer system.

6.3 Methods and material for containment and cleaning up:

For containment: Contain the spill. Prevent entry into drains, sewers and other waterways. Area will be slippery until cleaned.

For clean-up: Wipe or scrape up spilled material. Wash spill area after material pick up is complete. Transfer to an approved container for disposal or recovery, by sweep-up or shovel.

Other information: Wear appropriate protective equipment.

6.4 Reference to other sections: None

Section 7 - Handling and storage

7.1 Precautions for safe handling:

Protective measures: Keep in the original container or an approved alternative made from a compatible material, kept tightly closed in a dry, cool environment, properly labeled, when not in use. Handle in accordance with good industrial hygiene and safety practice. Users should be alert to the possibility that a very small percentage of the population may display unexpected allergic reactions to otherwise innocuous lubricants and raw materials.

Measures to prevent fire: Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use non-sparking tools. Take precautionary measures against electrostatic discharges. To avoid fire or explosion- dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material.

Measures to protect the environment: Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Use appropriate containment to avoid environmental contamination.

Advice on general occupational hygiene: Avoid skin contact. Eating drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Wash hands and face before eating, drinking and smoking. Don't get in eyes or on skin or clothing. Do not ingest.

7.2. Conditions for safe storage,
including any incompatibilities: No additional information

7.3. Specific end use(s): None
