
Section 6: Accidental Release Measures

Avoid generating dust from this product. Clean up using methods that do not generate dust such as vacuum or wet clean up. Avoid pneumatic removal of dust. If dust is generated, use a respirator.

Section 7: Handling and Storage

Handling

Handle in accordance with good industrial hygiene and safety practices. Minimize dust generation. Use adequate ventilation if dust is generated.

Inhalation: Avoid prolonged or repeated breathing of dust.

Skin: Avoid prolonged or repeated contact with skin.

Eye: Avoid eye contact.

Storage

Store in a dry area. Contact with moisture may promote rust.

Section 8: Exposure Controls / Personal Protection

Recommended monitoring procedures

If user operations generate dust, use ventilation to keep exposure to airborne contaminants below applicable exposure limits.

Individual protection measures

Eye / Face: Use protective safety glasses with side shields or goggles if dust is generated.

Skin: Individuals with sensitive skin should wear protective gloves resistant to abrasion and mechanical hazard (i.e., leather or cloth) that covers any skin that may come into repeated or prolonged contact with this product or any dust generated from this product.

Respiratory: The specific respirator selected must be based on the airborne concentration found in the workplace and must not exceed the working limits of the respirator.
