## Biological limit values

No biological exposure limits noted for the ingredient(s).

## Appropriate engineering controls

Use explosion-proof electrical equipment if airborne dust levels are high. Provide adequate ventilation. Observe Occupational Exposure Limits and minimize the risk of inhalation of dust.

## Individual protection measures, such as personal protective equipment

## Eye/face protection

Wear approved safety goggles.

## Skin protection

## Hand protection

Wear protective gloves. Wear protective gloves (i.e. latex, nitrile). Suitable gloves can be recommended by the glove supplier.

## Other

Wear suitable protective clothing.

## Respiratory protection

If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn. During dust-raising work: In the United States of America, if respirators are used, a program should be instituted to assure compliance with OSHA Standard 1910.134. Respirator type: Any powered, air-purifying respirator with a high-efficiency particulate filter.

## Thermal hazards

Wear appropriate thermal protective clothing, when necessary.

## General hygiene considerations

Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
