Engineering controls :

Friction materials are molded articles and neither gives off nor reveals hazard materials. But machining (grinding, drilling, etc.) can result in the release of airborne dust, and OSHA permissible exposure Level (PEL) excessive dust is considered hazardous. use local ventilation.

Personal Protective Equipment :

Respiratory protection :	Not required under normal conditions and adequate ventilation. If the exposure limit is exceeded, use of NIOSH approved face mask(N-95 or better) is recommended. In the case of fire or explosion, Self Contained Breathing Apparatus (SCBA) should be used.
Hand protection	Rubber gloves are recommended.
Eye protection :	Safety glasses are recommended.
Skin and body protection :	Work clothes that can avoid contact with dust is recommended.
General hygiene considerations :	Avoid breathing the dust. Avoid contact with dust and skin, eyes. Wash thoroughly after handling.
