

SECTION-7 HANDLING AND STORAGE

Handling : Keep away from fire, heat, and flame. Avoid breathing or creating dust.

Storage : Keep away from fire, heat, and flame. Keep material dry. Keep away from acids, alkalis.
Exhaust ventilation is recommended.

Engineering controls :

Friction materials are molded articles and neither gives off nor reveals hazard materials. But machining (grinding, drilling, etc) can result in the release of airborne dust, and dust excess OSHA permissible exposure Level (PEL) is considered hazardous.

Personal Protective Equipment :

Eye/face protection : Safety glasses are recommended.

Skin protection : Nitrile rubber gloves are recommended.

Respiratory protection : Not required under normal conditions and adequate ventilation. If the exposure limit is exceeded, use of NIOSH approved face mask(N-95 or better) is recommended.

In the case of fire or explosion, Self Contained Breathing Apparatus (SCBA) should be used.

General hygiene considerations : Wash thoroughly after handling.
