# 3M(TM) Scotch-Weld(TM) Structural Plastic Adhesive DP8005 Translucent, Part B 04/16/15

### 10.6. Hazardous decomposition products

**Substance** 

Condition

None known.

Refer to section 5.2 for hazardous decomposition products during combustion.

# **SECTION 11: Toxicological information**

The information below may not be consistent with the material classification in Section 2 if specific ingredient classifications are mandated by a competent authority. In addition, toxicological data on ingredients may not be reflected in the material classification and/or the signs and symptoms of exposure, because an ingredient may be present below the threshold for labeling, an ingredient may not be available for exposure, or the data may not be relevant to the material as a whole.

# 11.1. Information on Toxicological effects

## Signs and Symptoms of Exposure

Based on test data and/or information on the components, this material may produce the following health effects:

#### **Inhalation:**

Respiratory Tract Irritation: Signs/symptoms may include cough, sneezing, nasal discharge, headache, hoarseness, and nose and throat pain.

#### **Skin Contact:**

Skin Irritation: Signs/symptoms may include localized redness, swelling, itching, dryness, cracking, blistering, and pain. Allergic Skin Reaction (non-photo induced): Signs/symptoms may include redness, swelling, blistering, and itching.

# **Eye Contact:**

Severe Eye Irritation: Signs/symptoms may include significant redness, swelling, pain, tearing, cloudy appearance of the cornea, and impaired vision.

### **Ingestion:**

May be harmful if swallowed.

Gastrointestinal Irritation: Signs/symptoms may include abdominal pain, stomach upset, nausea, vomiting and diarrhea.

### **Toxicological Data**

If a component is disclosed in section 3 but does not appear in a table below, either no data are available for that endpoint or the data are not sufficient for classification.

### **Acute Toxicity**

| Name                            | Route       | Species | Value   |
|---------------------------------|-------------|---------|---|
| Overall product                 | Ingestion   |         | No data available; calculated ATE 2,000 - 5,000 |
|                                 |             |         | mg/kg   |
| Tetrahydrofurfuryl Methacrylate | Ingestion   |         | LD50 estimated to be 2,000 - 5,000 mg/kg        |
| 2-Ethylhexyl Methacrylate       | Dermal      |         | LD50 estimated to be > 5,000 mg/kg              |
| 2-Ethylhexyl Methacrylate       | Ingestion   | Rat     | LD50 > 2,000 mg/kg                              |
| Impact Modifier                 | Ingestion   |         | LD50 estimated to be 2,000 - 5,000 mg/kg        |
| Succinic Anhydride              | Dermal      |         | LD50 estimated to be 1,000 - 2,000 mg/kg        |
| Succinic Anhydride              | Ingestion   | Rat     | LD50 1,510 mg/kg                                |
| 2-Hydroxyethylmethacrylate      | Dermal      | Rabbit  | LD50 > 5,000 mg/kg                              |
| 2-Hydroxyethylmethacrylate      | Ingestion   | Rat     | LD50 5,564 mg/kg                                |
| Methyl Methacrylate             | Dermal      | Rabbit  | LD50 > 5,000 mg/kg                              |
| Methyl Methacrylate             | Inhalation- | Rat     | LC50 29 mg/l                                    |
|                                 | Vapor (4    |         |   |
|                                 | hours)      |         |   |
| Methyl Methacrylate             | Ingestion   | Rat     | LD50 7,900 mg/kg                                |
