

# Safety Data Sheet

Printing date 09/04/2015 Reviewed on 09/04/2015

Trade name: PA 4645-2

(Contd. of page 2)

#### · Control parameters

· Control parameters	
· Components with limit values that require monitoring at the workplace:	
7440-50-8 copper	
PEL	Long-term value: 1* 0.1** mg/m³ as Cu *dusts and mists **fume
REL	Long-term value: $1*0.1**mg/m^3$ as Cu *dusts and mists **fume
TLV	Long-term value: 1* 0.2** mg/m³ *dusts and mists; **fume; as Cu
1317-37-9 iron sulphide	
REL	Long-term value: 1 mg/m³ as Fe
TLV	Long-term value: 1 mg/m³ as Fe
7782-42-5 Graphite	
PEL	Long-term value: 15 mppcf* mg/m³ *impinger samples counted by light field techn.
REL	Long-term value: 2.5* mg/m³ *respirable dust
TLV	Long-term value: 2* mg/m³ all forms except graphite fibers; *resp. fraction

- · Additional information: The lists that were valid during the creation were used as basis.
- · Exposure controls
- · Personal protective equipment:
- · General protective and hygienic measures: Wash hands before breaks and at the end of work.
- Breathing equipment:

In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use respiratory protective device that is independent of circulating air.

### Protection of hands:

Wear gloves for the protection against mechanical hazards according to EN 388.

Use gloves of stable material (e.g. Nitrile) - if necessary tricoted to improve the wearability.

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

### · Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

## Recommendation:

Palm coated industrial gloves with good levels of comfort and abrasion resistance.

for example:

Standard ANSI/ISEA 105-2011

abrasion resistance: 4 cut resistance: 1 puncture resistance: 1

Standard EN388: 4131
